Health Examination Report

健康检查报告

	姓名:	毕盛
	性别:	男
	年龄:	25
	体检号:	PTAAYS0236
	联系电话:	15825159667
	体检日期:	2025-01-22
单位:	1月滇医通	
部门:		
登记号:	 *0000804092*	

总检室

本次结论

- [1] [心电图: T波高尖]
[2] [非高密度脂蛋白胆固醇: 3.60 ↑ mmol/L [1.6-3.4]]
[3] [血常规: 中性粒细胞减少]
[4] [血常规: 淋巴细胞升高]
[5] [肾功: 尿酸偏高]
[6] [牙结石]
[7] [龋齿]
[8] [智齿]

建议

- 1、[心电图: T波高尖]
注意排除电解质紊乱。检查肾功能, 血电解质中钾离子水平。建议心血管内科就诊, 进一步治疗。
- 2、[非高密度脂蛋白胆固醇: 3.60 ↑ mmol/L [1.6-3.4]]
(1)调整饮食结构, 不吃动物内脏(脑、肝、肾、肚等); 低脂、低糖饮食; 控制食量, 锻炼身体, 控制体重, 戒烟、酒; (2)建议心内科就诊。
- 3、[血常规: 中性粒细胞减少]
可见于细菌性感染、急性中毒等, 剧烈运动或劳动后、饱餐、高温或严寒时也可一过性增多。建议复查或内科门诊进一步检查。
- 4、[血常规: 淋巴细胞升高]
血淋巴细胞增多主要见于病毒感染, 建议您复查, 如明显持续升高请到血液科进一步诊治。
- 5、[肾功: 尿酸偏高]
(1)避免全日摄入过高蛋白质; 低嘌呤饮食(禁用肝、肾、脑、蛤蜊、蟹、鱼、肉汤、鸡汤、豌豆、扁豆、蘑菇等, 不饮啤酒); (2)一周后复查。如仍异常建议到肾内科就诊。
- 6、[牙结石]
是附着在牙齿上的异物硬块。由于牙石本身容易吸附更多的细菌毒素, 故易诱发牙龈炎、牙周炎。平时应认真刷牙, 少进食松软粘性食物, 定期到口腔科清除牙石。
- 7、[龋齿]
俗称“虫牙”, 是牙在以细菌为主的多种因素影响下发生的慢性进行性破坏性疾病。平时注意口腔卫生, 建议到口腔科门诊进一步诊治。

体检编号: PTAAY50236 姓名: 毕盛 性别: 男 年龄: 25 健康档案号: *0000804092*

3/15

- 8、[智齿]
建议口腔科进一步诊治, 必要时拔除患牙。

昆明医科大学第二附属医院 心电图报告单

姓名: 毕盛

登记号: 0000804092

心房率: 60bpm

性别: 男

科室: 健康管理中心

心室率: 60bpm

年龄: 25岁

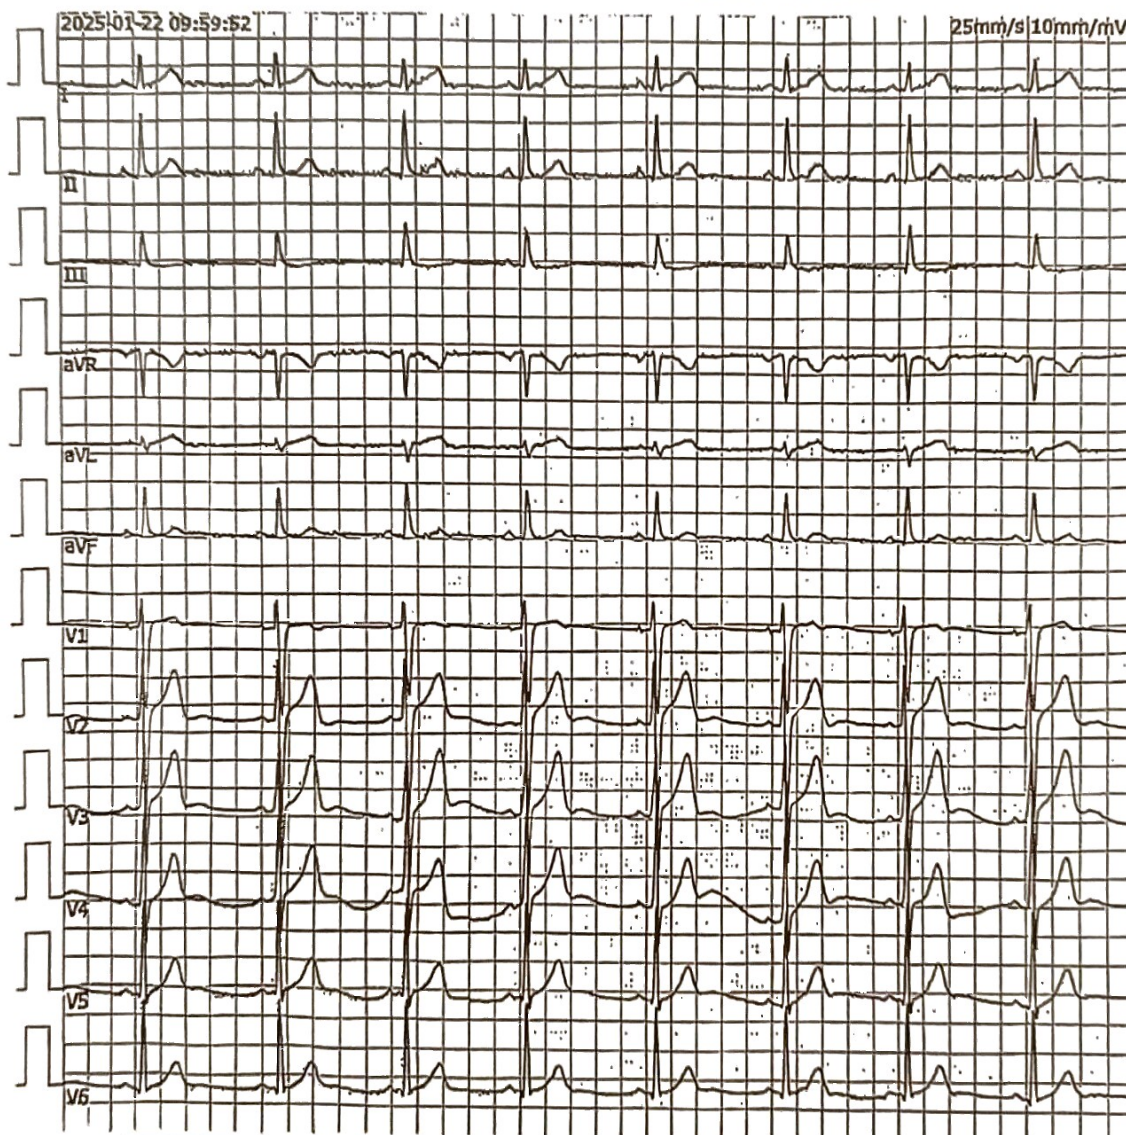

P-R间期: 123ms

QRS时间: 109ms

QT/QTc: 396/396ms

P-R-T: 87 /61 /207度

SV1/RV5: 1.43/1.63mv

诊断: 1. 窦性心律
2. T波高尖

特征:

P波: I、II、aVF、V4~V6直立, 在aVR倒置
频率60~100次/分之间, 同一导联上P-P间期
差异<0.16s
V2、V3、V4:T波高尖

	Physical Examination Date:	2025-01-22
Unit:	January Dianyitong	
Department:		
Registration No.	<i>Bar Code</i> *0000804092*	

Hotline: 0871-63402536

Address: No. 374 Dianmian Avenue, Kunming City

General Examination Room

Conclusion:

- [1] [Electrocardiogram: high sharp T-wave]
- [2] [Non-high density lipid protein cholesterol: 3.60 ↑ mmol/L [1.6-3.4]]
- [3] [Blood routine: neutropenia]
- [4] [Blood routine: elevated lymphocyte cells]
- [5] [Renal function: high uric acid]
- [6] [Dental calculus]
- [7] [Dental caries]
- [8] [wisdom tooth]

Suggestion:

1. [Electrocardiogram: high sharp T-wave]

Care was taken to rule out electrolyte disturbances. Renal function and potassium levels in blood electrolytes were examined. It is recommended to consult the cardiovascular department for further treatment.

2. [Non-high density lipoprotein cholesterol: 3.60 ↑ mmol/L [1.6-3.4]]

(1) Adjust the diet structure, do not eat animal viscera (brain, liver, kidney, stomach, etc.); Low-fat, low-sugar diet; Control food intake, exercise, weight control, smoking cessation, alcohol; (2) It is recommended to consult the cardiology department.

3. [Blood routine: neutropenia]

It can be seen in bacterial infection, acute poisoning, etc., after strenuous exercise or labor, full meal, high temperature or severe cold can also increase temporarily. Review or further investigation in the medical clinic is recommended.

4. [Blood routine: elevated lymphocyte cells]

Hemolymphocytosis is mainly seen in viral infection. It is recommended that you recheck. If the increase is obvious and persistent, please go to the hematology department for further diagnosis and treatment.

5. [Renal function: high uric acid]

(1) Avoid excessive protein intake throughout the day; Low-purine diet (forbid the eating of liver, kidney, brain, clams, crabs, fish, broth, chicken soup, peas, lentils, mushrooms, etc. beer); (2) Reexamination after one week. If still abnormal, it is recommended to consult the nephrology department.

6. [Dental calculus]

It is a hard foreign body attached to the tooth. Because the calculus itself is easy to adsorb more

bacterial toxins, it is easy to induce gingivitis and periodontitis. Usually should brush teeth carefully eat less soft sticky food, regular to the dental department to remove calculus.

7. [Dental caries]

Commonly known as "insect tooth", it is a chronic progressive destructive disease of teeth that occurs under the influence of a variety of factors, mainly bacteria. You should pay attention to oral hygiene at ordinary times and recommend further diagnosis and treatment in the dental clinic.
